

NORTHFIELD

AUTO CHA-VI

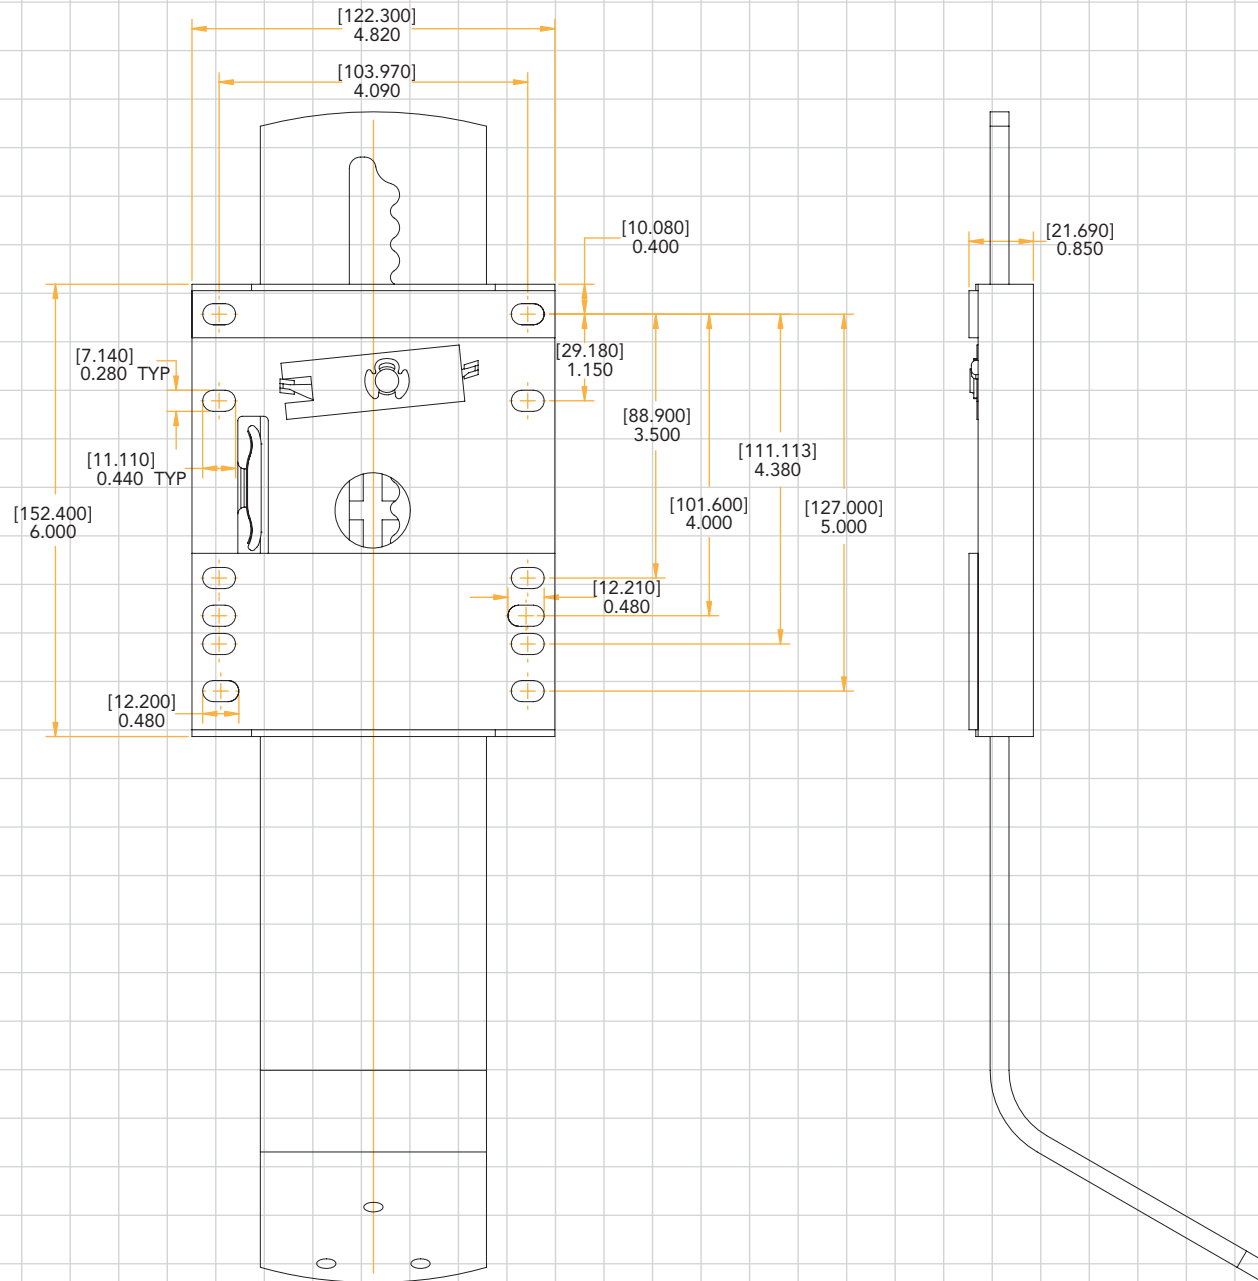

The Auto Concealed Height Adjuster VI back upright option provides vertical adjustment to allow the lumbar support to be placed where it is needed on your chair. The Auto CHA-VI is available in 3.00" width material and can be added to all 3.00" wide flat bar back uprights.

Height adjustment is obtained by lifting up on the chair back. The CHA mechanism operates by moving the chair back up on a concealed ratchet system within the back itself. Once the maximum height is reached a further lift returns the chair back to the bottom of its height adjustment.

MEASUREMENTS

DETAILS

The Auto CHA-VI is available in three travels – 2 5/8" (7 locking positions), 3 15/16" inches (10 locking positions), and 5 1/4" inches (13 locking positions).

Depending on your chair requirements the Auto Concealed Height Adjuster VI can be utilized on 1/4" and 5/16" back bar material.

Allow us to customize your back upright needs by providing infinite solutions regarding back bar angle, height, and hole pattern / slot configurations to further refine the look and feel of your chair.
