

T991 Synchro-Tilt

This low profile Synchro-Tilt mechanism has a 2:1 seat to back ratio. The T991 was developed for a two piece chair and comes with the Top Activation Option. The JBUM option allows 2.25" or 3.00" wide j-shaped back uprights to be assembled to the mechanism providing back depth adjustment.

The T991 ST JBUM mechanism can also be equipped with the single position tilt lock option that is adjusted with a lever located at the front of the mechanism.

A welded Euro Back (EB) is also available which allows the most popular back upright feature to be assembled to the mechanism.

Manual height adjustment is available with a spindle, bell and washer combination.
